Total Units	72480	81592	77489	63307	42312	24822	32417	394419

* Substandard is not a census determination, but is defined by the U.S. Department of Housing and Urban Development for rental units as having at least one of the following conditions: a) lacking complete plumbing facilities for exclusive use, b) more than 1.0 person per room, or c) more than 30 percent of houshold income is used for gross rent. Any one of these conditions would cause a housing unit to be considered substandard.

* Substandard is not a census determination, but is defined by the U.S. Department of Housing and Urban Development for rental units as having at least one of the following conditions: a) lacking complete plumbing facilities for exclusive use, b) more than 1.0 person per room, or c) more than 30 percent of houshold income is used for gross rent. Any one of these conditions would cause a housing unit to be considered substandard.

* Substandard is not a census determination, but is defined by the U.S. Department of Housing and Urban Development for rental units as having at least one of the following conditions: a) lacking complete plumbing facilities for exclusive use, b) more than 1.0 person per room, or c) more than 30 percent of houshold income is used for gross rent. Any one of these conditions would cause a housing unit to be considered substandard.

* Substandard is not a census determination, but is defined by the U.S. Department of Housing and Urban Development for rental units as having at least one of the following conditions: a) lacking complete plumbing facilities for exclusive use, b) more than 1.0 person per room, or c) more than 30 percent of houshold income is used for gross rent. Any one of these conditions would cause a housing unit to be considered substandard.

* Substandard is not a census determination, but is defined by the U.S. Department of Housing and Urban Development for rental units as having at least one of the following conditions: a) lacking complete plumbing facilities for exclusive use, b) more than 1.0 person per room, or c) more than 30 percent of houshold income is used for gross rent. Any one of these conditions would cause a housing unit to be considered substandard.

* Substandard is not a census determination, but is defined by the U.S. Department of Housing and Urban Development for rental units as having at least one of the following conditions: a) lacking complete plumbing facilities for exclusive use, b) more than 1.0 person per room, or c) more than 30 percent of houshold income is used for gross rent. Any one of these conditions would cause a housing unit to be considered substandard.

* Substandard is not a census determination, but is defined by the U.S. Department of Housing and Urban Development for rental units as having at least one of the following conditions: a) lacking complete plumbing facilities for exclusive use, b) more than 1.0 person per room, or c) more than 30 percent of household income is used for gross rent. Any one of these conditions would cause a housing unit to be considered substandard.

*) Substandard is not a census determination, but is defined by the U.S. Department of Housing and Urban Development for rental units as having at least one of the following conditions: a) lacking complete plumbing facilities for exclusive use, b) more than 1.0 person per room, or c) more than 30 percent of houshold income is used for gross rent. Any one of these conditions would cause a housing unit to be considered substandard.

* Substandard is not a census determination, but is defined by the U.S. Department of Housing and Urban Development for rental units as having at least one of the following conditions: a) lacking complete plumbing facilities for exclusive use, b) more than 1.0 person per room, or c) more than 30 percent of houshold income is used for gross rent. Any one of these conditions would cause a housing unit to be considered substandard.

* Substandard is not a census determination, but is defined by the U.S. Department of Housing and Urban Development for rental units as having at least one of the following conditions: a) lacking complete plumbing facilities for exclusive use, b) more than 1.0 person per room, or c) more than 30 percent of houshold income is used for gross rent. Any one of these conditions would cause a housing unit to be considered substandard.

* Substandard is not a census determination, but is defined by the U.S. Department of Housing and Urban Development for rental units as having at least one of the following conditions: a) lacking complete plumbing facilities for exclusive use, b) more than 1.0 person per room, or c) more than 30 percent of houshold income is used for gross rent. Any one of these conditions would cause a housing unit to be considered substandard.

* Substandard is not a census determination, but is defined by the U.S. Department of Housing and Urban Development for rental units as having at least one of the following conditions: a) lacking complete plumbing facilities for exclusive use, b) more than 1.0 person per room, or c) more than 30 percent of houshold income is used for gross rent. Any one of these conditions would cause a housing unit to be considered substandard.

* Substandard is not a census determination, but is defined by the U.S. Department of Housing and Urban Development for rental units as having at least one of the following conditions: a) lacking complete plumbing facilities for exclusive use, b) more than 1.0 person per room, or c) more than 30 percent of houshold income is used for gross rent. Any one of these conditions would cause a housing unit to be considered substandard.

* Substandard is not a census determination, but is defined by the U.S. Department of Housing and Urban Development for rental units as having at least one of the following conditions: a) lacking complete plumbing facilities for exclusive use, b) more than 1.0 person per room, or c) more than 30 percent of houshold income is used for gross rent. Any one of these conditions would cause a housing unit to be considered substandard.

* Substandard is not a census determination, but is defined by the U.S. Department of Housing and Urban Development for rental units as having at least one of the following conditions: a) lacking complete plumbing facilities for exclusive use, b) more than 1.0 person per room, or c) more than 30 percent of houshold income is used for gross rent. Any one of these conditions would cause a housing unit to be considered substandard.

* Substandard is not a census determination, but is defined by the U.S. Department of Housing and Urban Development for rental units as having at least one of the following conditions: a) lacking complete plumbing facilities for exclusive use, b) more than 1.0 person per room, or c) more than 30 percent of houshold income is used for gross rent. Any one of these conditions would cause a housing unit to be considered substandard.

* Substandard is not a census determination, but is defined by the U.S. Department of Housing and Urban Development for rental units as having at least one of the following conditions: a) lacking complete plumbing facilities for exclusive use, b) more than 1.0 person per room, or c) more than 30 percent of houshold income is used for gross rent. Any one of these conditions would cause a housing unit to be considered substandard.

* Substandard is not a census determination, but is defined by the U.S. Department of Housing and Urban Development for rental units as having at least one of the following conditions: a) lacking complete plumbing facilities for exclusive use, b) more than 1.0 person per room, or c) more than 30 percent of houshold income is used for gross rent. Any one of these conditions would cause a housing unit to be considered substandard.

* Substandard is not a census determination, but is defined by the U.S. Department of Housing and Urban Development for rental units as having at least one of the following conditions: a) lacking complete plumbing facilities for exclusive use, b) more than 1.0 person per room, or c) more than 30 percent of houshold income is used for gross rent. Any one of these conditions would cause a housing unit to be considered substandard.

* Substandard is not a census determination, but is defined by the U.S. Department of Housing and Urban Development for rental units as having at least one of the following conditions: a) lacking complete plumbing facilities for exclusive use, b) more than 1.0 person per room, or c) more than 30 percent of houshold income is used for gross rent. Any one of these conditions would cause a housing unit to be considered substandard.

* Substandard is not a census determination, but is defined by the U.S. Department of Housing and Urban Development for rental units as having at least one of the following conditions: a) lacking complete plumbing facilities for exclusive use, b) more than 1.0 person per room, or c) more than 30 percent of houshold income is used for gross rent. Any one of these conditions would cause a housing unit to be considered substandard.

* Substandard is not a census determination, but is defined by the U.S. Department of Housing and Urban Development for rental units as having at least one of the following conditions: a) lacking complete plumbing facilities for exclusive use, b) more than 1.0 person per room, or c) more than 30 percent of houshold income is used for gross rent. Any one of these conditions would cause a housing unit to be considered substandard.

* Substandard is not a census determination, but is defined by the U.S. Department of Housing and Urban Development for rental units as having at least one of the following conditions: a) lacking complete plumbing facilities for exclusive use, b) more than 1.0 person per room, or c) more than 30 percent of houshold income is used for gross rent. Any one of these conditions would cause a housing unit to be considered substandard.

* Substandard is not a census determination, but is defined by the U.S. Department of Housing and Urban Development for rental units as having at least one of the following conditions: a) lacking complete plumbing facilities for exclusive use, b) more than 1.0 person per room, or c) more than 30 percent of houshold income is used for gross rent. Any one of these conditions would cause a housing unit to be considered substandard.
